

 **Optix170™ 9-LED Modules**

Brightness	Ease of use	Cost
★★★★☆	★★★★★	★☆☆☆☆
Availability	Color Temp	Voltage
Stock	6500K	12V DC
Power	Length	Width
7W ea.	3.70"	3.70"

 **What it is used for**

Back-lighting displays with a minimum depth of 2.25"

 **How to use it**

Optix170s 9-LED modules are designed to be used for back lighting displays. Each module includes peel & stick tape for easy installation. Best if placed on a white, reflective surface to maximize light output.

 **Specifications per application**

Optic Lenses	170° Angle	Special beam angle produces even light across shallow light boxes
Distance – LED to Face/Graphic	2.25" Standard	One module will light approximately 1 sq. ft.
Standard Color	6500 K	Additional CCT can be produced depending on LED availability
Module Size/Power	3.70" x 3.70"	7 watts per module

 **Pros & Cons**

**Pros**

- Uniform illumination
- Easy installation
- Economical solution
- Light boxes as thin as 2.25"
- No heat sink needed
- 3-year limited warranty

**Cons**

- Only available in 12V DC
- Module is fixed size
